### About the Project

#### Developing Key Transversal Skills

Acquiring transversal skills has now become more important than ever. For that reason, the Skill Pics project proposes a variety of resources to develop transversal skills essential for a successful integration in the workforce, such as digital literacy, entrepreneurship, critical and creative thinking, leadership, innovation, problem solving, teamwork and social impact. Skills Pics uses a problem-based learning approach and innovative learning technologies to provide tools that can support VET learners and providers in their learning and teaching experience.

### What we have been doing...

The Skill-Pics partners have been working on the development of the interactive infographics. Each infographic is comprised of a quiz, a digital breakout, a webquest and an explainer video. We will have more updates soon, so don't forget to follow the project's website and Facebook page.
