

The Skill-Pics Project

In the always evolving labour market, it's important to work on the continuous improve of our skills in order to become a more valuable and adaptable employee or employer.

For that reason, since September 2020, the Skill-Pics project team has been focused on creating learning materials and opportunities for the development of key transversal skills, such as leadership, entrepreneurship, digital literacy, and critical and creative thinking, among others.

The Outcomes

The Skill-Pics project resulted had three main outcomes, one of them being an e-learning platform dedicated to the project. The registration and courses on the

learning.skillpics.eu

platform is completely free. In the MOOC, you will find the other outcomes: a compendium of interactive infographics for anyone interested in improving their transversal skills, and an in-service training programme for educators, which will give them pedagogic and digital skills to work in an online environment.

Latest News

During the last few months, the Skill-Pics team has been presenting the outcomes and activities of the project to the young adults, vet professionals, the general community and anyone else interested. Partners have conducted piloting sessions where we could test and receive feedback on the materials developed, with the goal of providing learning resources with the best quality possible. We also held Skill-Pics workshops in all partner countries, which aimed to raise awareness about the project and the topics it addresses.

Goodbye!

As the project is reaching its final months, the Skill-Pics team has met in person for the last time, on October 11th and 12th. But, because the project's lifecycle reaching the final months of implementation, it doesn't mean that it's the end. The skill-pics MOOC will remain available for years to come, as well as the project's website, where you can find the details on how to contact the organisations that worked on the project in case of any inquiries.
